D.O. No.CEO/IT application/PMJAY/20/18

20th November, 2018

Dear colleagues,

As we complete two months of Ayushman Bharat - Pradhan Mantri Jan Arogya Yojana, our IT team has been working to develop and bring in necessary changes/revisions in the IT systems changes to help you in better implementation of PM-JAY in your state. These will be implemented from today, 20th November 2018.

These changes in PM-JAY IT applications are explicated as under:

1. State Approver Clusters

State Approvers of all States will now be able to view/approve/recommend/reject records from a cluster list of districts/sub-districts.

The State Approvers will be mapped with the list of districts/sub-districts as per Local Government Directory (LGD) codes of beneficiary districts/sub-districts.

Sub-district wise mapping of State Approvers can only be done for rural beneficiaries of the state. For urban beneficiaries, district wise beneficiary mapping will be done.

The state is required to provide the State Approver and district/sub-district wise mapping with NHA Product team in order to use this functionality.

The state may choose to continue with the existing process of approval.

2. eKYC of beneficiary

On the Family Details Page, the PMAM/CSC VLEs will now be able to upload two images of family ID document. Uploading one family ID image is mandatory, the upload of second image is kept as non-mandatory.

3. Pre-authorization initiation

After registering the patient in TMS, it would allow the hospitals to raise new Pre-Auth (using a single form) directly from Pre-Auth Initiation (New) tab. Patient can be converted to IP or OP, Primary diagnosis and procedure details can be selected in this page. Registered Patient View has been removed.

4. Treatment / Surgery & Discharge Update

Once a Pre-auth has been approved, TMS would allow the details of the surgery / treatment and discharge to be filled through a single form once the patient is ready to be discharged. Hence, Cases for Surgery / Treatment Updation tab has been removed and Cases for Discharge Updation tab has been renamed as Cases for Surgery / Discharge tab.

5. Auto-approval of Pre-authorizations:

All pre-auths would be auto-approved by the system if not approved within 6 hours

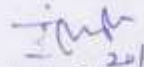

6. Claim Payment Update:

For cases where the claims have been paid to hospitals, SHA needs to upload the claim payment details (response file). Post upload, TMS would reflect that the claim has been paid.

I hope these changes will help your state in effective implementation of PM-JAY scheme and look forward to your feedback on these soon.

kind regards,

Yours sincerely,

24/11/15
(Dr. Indu Bhushan)

To all State Health Secretaries
